

Assignment Two – How Sweet Is This

Description:

Using everything that we have covered over the course of the semester, create a web page about your favorite candy. Incorporate some interesting facts about the candy, some eye-popping imagery, and perhaps even some nutritional information.

Instructions:

Please carefully read and follow the instructions found below:

- Select your favorite candy.
- Gather images and text about your candy. Please do not use filler text for the content of the web page.
- The layout for the page should be created using a liquid approach. This does not mean that the layout needs to be full-width but if the page is not full-width the contents of the page should be aligned to the center of the browser.
- The page should be constructed with the appropriate semantic HTML elements.
- Create a separate CSS file to manage all the styling for the webpage.
- Use a custom font that would be appropriate for the type of content that will be on the webpage.
- Create an eye-catching call to action.
- Create an engaging site navigation.
- Create a footer that contains a logo, company information, and a quick contact form (just the frontend, the form does not need to work!).
- Validate your HTML & CSS.
- Upload to your webserver.

Submitting Your Work:

Upload your files to your webserver and submit both the URL and a zipped copy of your files to Blackboard.

Evaluation:

Please refer to the chart below for a breakdown of the marks:

Task	0 - 1	2 - 3	4 - 5	Total
Required metadata				/5
Valid HTML				/5
Valid CSS				/5
Semantic elements				/5
Custom font				/5
Liquid layout				/5
Call to action				/5
Site navigation				/5
Overall page design				/5
Total				/45
